## HIGHLIGHTS

1. In Fall 1963, there were 801,000 enrollments in modern foreign languages in 1780 institutions of higher education in the United States—an increase of 31 per cent over Fall 1960. Total enrollment in the same institutions increased by 30 per cent—from 3,200,000 in 1960 to 4,215,000 in 1963. (See Table IV.)
2. Three languages accounted for nine-tenths of the MFL total in Fall 1963: French, with 302,000 enrollments (37%), Spanish with 246,000 (31%), and German with 183,000 (23%). (See Table I.)
3. Graduate enrollments in MFLs leaped from 18,000 in 1960 to 32,000 in 1963—an increase of 75 per cent, or almost double the rate of total graduate school enrollment growth. Among the individual languages, Spanish led the field, with an increase of 118%; French was second, with 82%; German was third, with 64%. (See Chart D, page v.)
4. In Fall 1963, French was the leading language in 39 states and the District of Columbia. Its enrollment grew by a third between 1960 and 1963. (See Table X.)
5. Spanish held first place in six states in Fall 1963, and second place in 34. Between 1960 and 1963, its enrollment increased by 38%. (See Table XIV.)
6. German enrollment increased by a fourth in the period 1960-1963. In Fall 1963, German led in five states and was second in eight. (See Table XI.)
7. Italian made an impressive gain of 51% from 1960 to 1963, to become first in rate of growth among the top five. (See Table XII.)
8. Russian continues to be broadly based, with enrollments reported from all but one state (Nevada) in Fall 1963. Its enrollment gain between 1960 and 1963 was 10 per cent. (See Table XIII.)
9. Among the 66 "other" modern foreign languages reporting enrollments in Fall 1963, Hebrew was in first place, followed by Japanese and Chinese. Portuguese, now in fourth place, has doubled in enrollment since 1960. (See Chart F, page vi, and Table XVIII.)
10. The regions of greatest MFL growth over the past four years were the Rocky Mountains, the Far West, and the Southwest. Italian enrollment, for example, more than tripled in the Rocky Mountain states, and German increased by 62%, French by 53%, and Spanish by 48%. (See Table VII and Tables X-XIV.)

## FOREWORD

The present study, sixth in a series of college language enrollment surveys that the Modern Language Association has conducted under contract with the U.S. Office of Education, is the first to include data for junior colleges, four-year colleges, and universities in a single report. The body of the report consists of eighteen tables; some of these present data for all of the 1780 institutions covered by the survey, others give information separately for the 1257 four-year institutions and the 523 junior colleges.

To provide background for the 1963 enrollment picture and to indicate trends within the four-year span of a college generation, enrollment data for 1960 and 1961 have been incorporated into the present report (no survey was made for 1962). The following MLA reports have been drawn upon for the comparative data used in this study: "Modern Foreign Language Teaching in Junior Colleges, Fall 1959 and Fall 1960" [includes enrollment information for 455 junior colleges]; "Modern Foreign Language Enrollments in [1206 four-year] Colleges and Universities, Fall 1960"; "Modern Foreign Language Teaching in [490] Junior Colleges, Fall 1961"; and "Modern Foreign Language Enrollments in [1226 four-year] Colleges and Universities, Fall 1961."

It should be borne in mind, in consulting the figures introduced into this report for purposes of comparison, that those for each year are derived from a different base--from a total of 1661 institutions in 1960 to 1716 in 1961 to 1780 in 1963. The year-by-year growth in number of colleges and of student enrollment has been matched, and even surpassed, by the increase in modern foreign language enrollment, as an examination of this report will show.

The research staff responsible for the report acknowledge with gratitude the splendid cooperation of the registrars and other college officials who supplied the enrollment data upon which it is based.

INSTITUTIONS OF HIGHER EDUCATION  
FALL 1963**

**COVERAGE**

The data for this report were obtained from questionnaires sent to 2180 institutions of higher education--junior colleges, four-year colleges, and universities--listed by the United States Office of Education. Three mailings of the questionnaire, supplemented by telephone calls, brought replies from all but 35 of these institutions. The mailings and returns are summarized below:

Number of Institutions Canvassed	Number of Replies	Per Cent of 2180	Number with MFLs	Per Cent of 2145	Number without MFLs	Per Cent of 2145
2180	2145	98.4	1780	83.0	365	17.0

The information supplied by the 1780 institutions that reported modern foreign language enrollments for Fall 1963 has been organized into 18 statistical tables, which constitute the body of this report (pp. 1-43).

**DESCRIPTION OF THE TABLES**

Tables I, II, and III are devoted to a state-by-state analysis of the MFL enrollments for Fall 1963. Individual enrollment figures are given for each of the five most commonly taught languages, together with the percentages that these figures represent of the total state enrollment in the language. Sixty-six additional languages, classified in these tables as "other MFLs," are treated in detail in Table XVIII.

Table I gives data for all of the 1780 institutions included in the survey, Table II gives the corresponding data for the 1257 four-year colleges and universities, and Table III covers the 523 junior colleges.

The graph on page ii presents the language-by-language totals for all institutions that reported MFL enrollments for Fall 1963, for all those that reported for Fall 1961 (the date of the last previous survey), and for all those that reported for Fall 1960 (but see the Foreword on the need for caution in comparing data for different years).

Comparative Enrollments in Modern Foreign Languages: Fall 1963, 1961, 1960

French, Spanish, and German, the only modern foreign languages that are taught in all 50 states and the District of Columbia; accounted for more than 90 per cent of the total MFL enrollment in 1963, as in previous years. The following chart shows the overall picture of enrollment distribution among the various languages:

Individual Language Percentage of Total MFL Enrollment

	<u>Fall 1963</u>	<u>Fall 1961</u>	<u>Fall 1960</u>
French	37.6	37.9	37.5
Spanish	30.8	29.4	29.3
German	22.8	23.6	24.0
Russian	4.2	4.9	5.0
Italian	2.1	1.9	1.9
Other MFLs	2.5	2.3	2.3

Table IV presents a mass of data designed to show, for each state, (1) the MFL enrollment in comparison with the total college population of the same institutions; (2) the MFL and institutional enrollments in the undergraduate, graduate, and "special and unclassified" categories; and (3) the individual MFL enrollments within each of the preceding categories. Charts A, B, and C, below, summarize the most important findings for Fall 1963, with figures for 1961 and 1960 added to indicate trends (see Foreword for source of all comparative data used in this report). In all the charts, the enrollment figures are for Fall in every case, and changes are calculated from Fall 1960 to Fall 1963 and Fall 1961. Even though no figures are available for 1962, the data given here suffice to present a clear picture of enrollment trends over the four-year span, 1960-1963.

One notes from a look at Chart A, on page iii, that the 1780 institutions covered by this survey reported over 800,000 enrollments in modern foreign languages in Fall 1963, an increase of almost a third since 1960. During the same period, total student enrollment in the same institutions rose at about the same rate. Between 1961 and 1963, however, the rate of increase in MFL enrollments did not quite equal the rate of student population growth. The same pattern is evident in Chart B, which deals exclusively with undergraduate enrollments.

Chart C presents a bright picture for graduate enrollments in MFLs: a 75 per cent increase between 1960 and 1963, a rate of growth almost double that of total graduate school enrollment. Chart D, on following page, gives a breakdown by language of the graduate gains. Spanish led in rate of growth, more than doubling its enrollment, but even the language with the smallest rate of increase (Russian) equalled the rate for graduate school enrollment as a whole.

Tables V and VI break down the data presented in Table IV for the four-year colleges and the junior colleges, respectively.

Tables VII, VIII, and IX show trends in total MFL enrollment between 1960 and 1963 in comparison with the total institutional enrollment for the same period. The data are arranged by region and state. Table VII covers all the institutions included in the survey, Table VIII covers the four-year colleges and universities, and Table IX covers the junior colleges.

Tables X through XIV, covering all the institutions surveyed, set forth enrollment trends individually for French, German, Italian, Russian, and Spanish, by region and state, over the period 1960-1963.

Table XV summarizes the MFL enrollments for the 1257 four-year colleges and universities, by individual language and region, again for the period 1960-1963. Table XVI does the same for the 523 junior colleges.

Table XVII is a directory of the institutions covered by the present study; it is arranged alphabetically by state, and gives the total enrollment of each institution, its total MFL enrollment, and a breakdown by language of the MFL total.

Table XVIII gives the enrollment figures for the 66 languages that are combined under "other MFLs" in the preceding tables. These languages accounted for 2.5 per cent of the total MFL enrollment in Fall 1963. Chart E, below, presents comparative figures for the 1960-1963 period.
